

## CHECKLIST ENVIRONMENTAL ASSESSMENT

<b>Project Name:</b>	2008 Land Banking – Dillon Unit – CLO – Sec. 26, T11S – R10W, Sec 2,13,& 24, T12S – R 10W
<b>Proposed Implementation Date:</b>	2008
<b>Proponent:</b>	These tracts were nominated by the lessee, Roger and Carrie Peters owners of Draggin Y Cattle Co., and brought forward now by DNRC.
<b>Location:</b>	<b>T12S, R10W, section 2</b> Part of Lot 2 east of interstate 15 (I-15) 21.63 acres <b>T12S, R10W, section 13,</b> NE1/4 NW1/4, east of I-15, & North of Kidd exit, ~ 7 acres <b>T12S, R10W, section 13,</b> that portion of the SW1/4NE1/4 east of I-15, that portion of the NW1/4SE1/4 east of I-15 & that portion of the SE1/4SE1/4 east of I-15 ~78 acres <b>T12S, R10W, section 24,</b> that portion of NE1/4NE1/4 east of I-15 ~15.17 acres <b>T11S, R10W, section 26,</b> that portion of SW1/4SW1/4 east of I-15 ~20acres Total Acres: ~141.80
<b>County:</b>	Beaverhead County
<b>Trust:</b>	Common School (~75.63 acres), M. S. U. Morrill (~66.17 acres)

### I. TYPE AND PURPOSE OF ACTION

Offer for Sale at Public Auction 141 acres of state land currently held in trust for the benefit of Common Schools, (sec 2 & 13, T12S-R10W, & sec 26 T11S – R10W) and MSU Morrill (sec13 & 24 T12S – R16W). Revenue from the sale would be deposited in a special account, with monies from other sales around the State, to purchase replacement lands meeting acquisition criteria related to legal access, productivity, potential income and proximity to existing state ownership which would then be held in trust for the benefit of the same beneficiary Trusts in relative proportion. The proposed sale is part of a program called Land Banking authorized by the 2003 Legislature, and updated by the 2007 Legislature. The purpose of the program is for the Department of Natural Resources and Conservation to overall, diversify uses of land holdings of the various Trusts, improve the sustained rate of return to the Trusts, improve access to state trust land and consolidate ownership. Three maps are attached to this EA checklist: 1. Labeled "Dillon Unit Land Banking 2008 Beaverhead County" is a general map of all state land within the county (blue) and those parcels of land considered for sale under land banking (red). 2. Labeled "Appendix B" is vicinity map showing the location of the proposed parcels covered under this EA checklist. 3. Labeled "Appendix C" is a satellite imagery map that indicates the tracts considered for sale in the EA checklist.

### II. PROJECT DEVELOPMENT

#### 1. PUBLIC INVOLVEMENT, AGENCIES, GROUPS OR INDIVIDUALS CONTACTED:

*Provide a brief chronology of the scoping and ongoing involvement for this project.*

- A letter was distributed in September 2004 to all state surface lessees informing them of the Land Banking Program and requesting nominations be submitted by lessees between October 1, 2004 and January 31, 2005. *(These tracts were nominated at that time and are now being considered as part of the second Statewide round of Land banking sales.)*
- Legal notices were published in the Dillon Tribune on 3/19/08 & 3/26/08 and, in the Montana Standard on 3/23/2008 and 3/30/08.

- Direct mailings were made to lessees, adjacent land owners, County Commissioners, State Legislators (from the involved Districts and who were associated with the legislation), and a host of organizations and individuals who had expressed previous interest in this process. A full listing of contacts is attached as “Appendix D”.
- Follow-up contacts were made by phone, mail, or email with parties requesting additional information. These are also included in “Appendix D”.
- The tracts were also posted on the DNRC web page at, <http://dnrc/mt.gov//TLMSPublic/LandBanking/LBTest.aspx>

**2. OTHER GOVERNMENTAL AGENCIES WITH JURISDICTION, LIST OF PERMITS NEEDED:**

No other governmental agencies have jurisdiction over this proposal.

**3. ALTERNATIVES CONSIDERED:**

Alternative A (No Action) – Under this alternative, the State retains the existing land ownership pattern and would not sell the ~75.63 acres of Common Schools Trust Land contained in Section 26 T11S – R10W & Sec 2, 13, T12S – R10W and ~66.17 acres of MSU Morrill Trust Land contained in Section 13, & 24 T12S – R10W.

Alternative B (the Proposed action) – Under this alternative, the Department would request and recommend approval by the Land Board to sell the proposed land locked tracts. If approved by the Board, the sale would be at public auction, subject to the requirements found in Title 77, Chapter 2, Part 3 of the Montana Codes Annotated. The income from the sale would be pooled with other land sale receipts from across the State to fund the purchase of other state land, easements, or improvements for the beneficiaries of the respective trusts. *(The State would then review available lands for sale which would generally have access and an increased potential for income. A separate public scoping and review would be conducted when a potentially suitable parcel was found. It is not possible for this analysis to make any direct parcel to parcel comparisons.)*

<b>III. IMPACTS ON THE PHYSICAL ENVIRONMENT</b>
---

- |   |
|---|
| <ul style="list-style-type: none"> <li>• <i>RESOURCES</i> potentially impacted are listed on the form, followed by common issues that would be considered.</li> <li>• Explain <i>POTENTIAL IMPACTS AND MITIGATIONS</i> following each resource heading.</li> <li>• Enter “NONE” if no impacts are identified or the resource is not present.</li> </ul> |
|---|

**4. GEOLOGY AND SOIL QUALITY, STABILITY AND MOISTURE:**

*Consider the presence of fragile, compactable or unstable soils. Identify unusual geologic features. Specify any special reclamation considerations. Identify any cumulative impacts to soils.*

USDA – NRCS soil surveys are not available for these tracts. The majority of these tracts are not suited for cultivated crops. The majority of the tracts are on a bench between the I-15 Freeway and an irrigation channel that flows out of the Red Rock river near Kidd, MT. These tracts are surrounded by native rangeland contained in large pastures historically used for livestock grazing. It is unlikely these tracts would be broken for agricultural production in the future or subdivided for home or commercial value. The proposal does not involve any on the ground disturbance, so there are no soil effect differences between the alternatives. It is expected that this land will be used for livestock grazing in the future. The State owns, and would retain ownership of, all mineral rights associated with these tracts.

---

**5. WATER QUALITY, QUANTITY AND DISTRIBUTION:**

*Identify important surface or groundwater resources. Consider the potential for violation of ambient water quality standards, drinking water maximum contaminant levels, or degradation of water quality. Identify cumulative effects to water resources.*

There is a recorded water right for two of these tracts. Other water quality and/or quality issue will not be impacted by the proposed action.

legal	Water right no.	Purpose	Source	Priority date
That portion of the SW1/4NE1/4 east of I-15, Sec13 T12S – R10W	41A215402	Irrigation		
That portion of NE1/4NE1/4 east of I-15,Sec24 T12S R10W	41A215402	Irrigation		

---

**6. AIR QUALITY:**

*What pollutants or particulate would be produced? Identify air quality regulations or zones (e.g. Class I air shed) the project would influence. Identify cumulative effects to air quality.*

The proposal does not include any on-the-ground activities, or changes to activities. No effects to air quality would occur.

---

**7. VEGETATION COVER, QUANTITY AND QUALITY:**

*What changes would the action cause to vegetative communities? Consider rare plants or cover types that would be affected. Identify cumulative effects to vegetation.*

These tracts are native rangeland situated near Kidd. Species composition is dominated by grasses which include Blue Bunch Wheat grass, winter fat, crested wheat grass, thread leaf sedge, needle and thread grass. Sub-dominate species include various forbs and shrubs. Portions of these tracts are abandoned irrigated hay ground (Sec 13 lease # 9467, and Sec 24 lease # 9468). Section 2 still has 0.6 acres of irrigated hay ground. The rest of the tracts have been taken out of crop land, and were re-seeded to grasses. Currently they are irrigated grazing ground.

Vegetation may be affected by numerous land management activities including livestock grazing, development, wildlife management or other agricultural use. It is unknown what land use activities may be associated with a change in ownership; however the vegetation on these tracts is typical of land throughout the vicinity and there are no known rare, unique cover types or vegetation on the tracts. It is expected that this land will be used for grazing livestock in the future. The nominating lessee has indicated that if they purchased these tracts, the land use would remain as grazing land. The proposal does not include any on-the-ground activities, or changes to activities and therefore we do not expect direct or cumulative effects would occur to vegetation as a result of the proposal.

---

**8. TERRESTRIAL, AVIAN AND AQUATIC LIFE AND HABITATS:**

*Consider substantial habitat values and use of the area by wildlife, birds or fish. Identify cumulative effects to fish and wildlife.*

The area is not considered critical wildlife habitat. However, these tracts provide habitat for a variety of animal species (deer, and ground squirrels), predators (coyote, fox & badger), other non-game mammals, raptors and various songbirds. The proposal does not include any land use change which would yield changes to the wildlife habitat. The proposed action will not impact wildlife forage, cover, or traveling corridors. Nor will this action change the juxtaposition of wildlife forage, water, or hiding and thermal cover.

The nominating lessee's have indicated that if they purchased these tracts, the land use would remain as grazing land. There are no unique or critical wildlife habitats associated with the state tracts and we do not expect direct or cumulative wildlife impacts would occur as a result of implementing the proposal. The proposed action will not have long-term negative effects on existing wildlife species and/or wildlife habitat because of its relatively small scale.

---

**9. UNIQUE, ENDANGERED, FRAGILE OR LIMITED ENVIRONMENTAL RESOURCES:**

*Consider any federally listed threatened or endangered species or habitat identified in the project area. Determine effects to wetlands. Consider Sensitive Species or Species of special concern. Identify cumulative effects to these species and their habitat.*

No specific on-site observations of Threatened or Endangered species have been recorded and no important habitat has been identified on the state lands. A review of Natural Heritage data through NRIS was conducted and Greater Sage Grouse and Gray wolf, Bald Eagle, Black Tailed Jack Rabbit and Ferruginous Hawk may use these tracts of ground.

The proposal does not include any activities which would alter any habitat, so no effects are expected in either alternative.

---

**10. HISTORICAL AND ARCHAEOLOGICAL SITES:**

*Identify and determine effects to historical, archaeological or paleontological resources.*

A class III level inventory and subsequent evaluation of cultural and paleontologic resources will be carried out if preliminary approval of the parcel nomination by the Board of Commissioners is received. Based on the results of the Class III inventory/evaluation the DNRC will, in consultation with the Montana State Historic Preservation Officer, assess direct and cumulative impacts.

---

**11. AESTHETICS:**

*Determine if the project is located on a prominent topographic feature, or may be visible from populated or scenic areas. What level of noise, light or visual change would be produced? Identify cumulative effects to aesthetics.*

These tracts are located in a foothill agricultural area and do not provide any unique scenic qualities that's not provided by adjacent private land. The proposal does not include any on-the-ground activities, so there would be no change to the aesthetics in either alternative.

---

**12. DEMANDS ON ENVIRONMENTAL RESOURCES OF LAND, WATER, AIR OR ENERGY:**

*Determine the amount of limited resources the project would require. Identify other activities nearby that the project would affect. Identify cumulative effects to environmental resources.*

There are 5,159,410 acres of Trust land in Montana (TLMS power search, 11/29/2007). There are approximately 334,478 acres of Trust land in Beaverhead County. This proposal includes ~141 acres, a small percentage of the state land within the County.

There are additional tracts of state land currently under consideration for sale through the Land Banking Program in Beaverhead County and throughout the state. In Beaverhead County there are approximately 750 acres of additional acres being considered for Land Banking sale. An additional 20,000 acres of trust land is being evaluated state wide under separate analysis.

The potential transfer of ownership will not have any impact or demands on environmental resources of land, water, air or energy.

---

**13. OTHER ENVIRONMENTAL DOCUMENTS PERTINENT TO THE AREA:**

*List other studies, plans or projects on this tract. Determine cumulative impacts likely to occur as a result of current private, state or federal actions in the analysis area, and from future proposed state actions in the analysis area that are under MEPA review (scoped) or permitting review by any state agency.*

There are no other projects or plans being considered on the tracts listed on this EA.

There are 5 tracts containing ~141 acres in Beaverhead County proposed for sale under the Land Banking Program and being evaluated under this EA. Other proposed tracts being considered in Beaverhead County will be covered in another EA checklist.

---

**IV. IMPACTS ON THE HUMAN POPULATION**

- *RESOURCES potentially impacted are listed on the form, followed by common issues that would be considered.*
- *Explain POTENTIAL IMPACTS AND MITIGATIONS following each resource heading.*
- *Enter "NONE" if no impacts are identified or the resource is not present.*

---

**14. HUMAN HEALTH AND SAFETY:**

*Identify any health and safety risks posed by the project.*

No impacts to human health and safety would occur as a result of the proposal.

---

**15. INDUSTRIAL, COMMERCIAL AND AGRICULTURE ACTIVITIES AND PRODUCTION:**

*Identify how the project would add to or alter these activities.*

The tracts included in this proposal are all leased by Draggin Y Cattle Company and Roger and Carrie Peters. Sale of the land to DragginY Cattle Company would add to their ranching operations. Below is a table that indicates the State rated carrying capacity of the tracts being considered for sale.

Legal	Acres	Lease #	State rated carrying capacity
Sec 2 T12S – R10W	21.63	10007	3 AUM
Sec 13 T12S – R10W	7	10007	2 AUM

Sec 13 T12S – R10W	~ 78	9467	88 AUM
Sec 24 T12S – R10W	~ 15	9468	12 AUM
Sec 26 T11S – R10W	~ 20	9865	2 AUM

This proposal does not include any specific changes to the agricultural activities. The nominating lessee indicated that grazing would continue unchanged if they purchased these lands. In the past, portions of these tracts have been used as irrigated hay ground. Two of the tracts still have water rights and are being used for irrigated grazing ground. The current lessee has no plans for using the ground for hay production. The lands were re-seeded to grass in the early 80ties and have been used for grazing since then.

No direct or cumulative impacts are anticipated as a result of the proposal.

**16. QUANTITY AND DISTRIBUTION OF EMPLOYMENT:**

*Estimate the number of jobs the project would create, move or eliminate. Identify cumulative effects to the employment market.*

The proposal would have no affect on quantity and distribution of employment.

**17. LOCAL AND STATE TAX BASE AND TAX REVENUES:**

*Estimate tax revenue the project would create or eliminate. Identify cumulative effects to taxes and revenue.*

State School Trust Lands are currently exempt from property tax. If State Trust Lands represent 6% or greater of the total acres within a county, a payment in lieu of taxes (PLT) is made to the counties to mitigate for the State Trust Land tax exempt status. Counties will not realize an adjustment in the PLT payment as a result of an increase or decrease in State Trust Land acreage. If all the parcels in this proposal are sold, and use continued as grazing land, Beaverhead County would receive ~ \$192.00 annually in additional property tax revenues.

**18. DEMAND FOR GOVERNMENT SERVICES:**

*Estimate increases in traffic and changes to traffic patterns. What changes would be needed to fire protection, police, schools, etc.? Identify cumulative effects of this and other projects on government services*

Being remote grazing lands, no traffic changes would be anticipated. These parcels of state ground are currently protected under the County Coop protection program. The proposed sale would add land to the county fire protection area, ~141 acres if all lands are sold.

**19. LOCALLY ADOPTED ENVIRONMENTAL PLANS AND GOALS:**

*List State, County, City, USFS, BLM, Tribal, and other zoning or management plans, and identify how they would affect this project.*

These tracts are surrounded by private land, and I-15 to the west of them. There are no zoning or other agency management plans affecting these lands.

**20. ACCESS TO AND QUALITY OF RECREATIONAL AND WILDERNESS ACTIVITIES:**

*Identify any wilderness or recreational areas nearby or access routes through this tract. Determine the effects of the project on recreational potential within the tract. Identify cumulative effects to recreational and wilderness activities.*

Montana FWP commented that “FWP would recommend not disposing of lands that are generally available (accessible) to the recreating public”. These parcels are all remnants of larger state ownership which were severed by Interstate 15, they are all bordered on the west by I-15 and otherwise surrounded by private land. The small acreages are indistinguishable from the adjacent private lands and consequently provide little to no recreational opportunity. If the tracts are sold, hunting access would be controlled by the new landowner as is the current situation.

---

**21. DENSITY AND DISTRIBUTION OF POPULATION AND HOUSING:**

*Estimate population changes and additional housing the project would require. Identify cumulative effects to population and housing*

The proposal does not include any changes to housing or developments. The nominating lessee has indicated that the lands would continue as grazing lands, if they purchase them at auction. No effects are anticipated.

---

**22. SOCIAL STRUCTURES AND MORES:**

*Identify potential disruption of native or traditional lifestyles or communities.*

There are no native, unique or traditional lifestyles or communities in the vicinity that would be impacted by the proposal.

---

**23. CULTURAL UNIQUENESS AND DIVERSITY:**

*How would the action affect any unique quality of the area?*

The State Trust lands in this proposal are currently managed for grazing. The State lands are generally indistinguishable from the adjacent private lands, with no unique quality.

The potential sale of the state land would not directly or cumulatively impact cultural uniqueness or diversity. It is unknown what management activities would take place on the land if ownership was transferred. The tracts were nominated by the lessee with the intent of purchasing and continuing use as grazing land.

---

**24. OTHER APPROPRIATE SOCIAL AND ECONOMIC CIRCUMSTANCES:**

*Estimate the return to the trust. Include appropriate economic analysis. Identify potential future uses for the analysis area other than existing management. Identify cumulative economic and social effects likely to occur as a result of the proposed action.*

Legal	acres	2008 Lease Income	Income per acre
Sec 2	21.63	\$18.54	\$0.86
Sec 13	7	\$12.36	\$1.76
Sec 13	78	\$543.84	\$6.97
Sec 24	15	\$74.16	\$4.94
Sec 26	20	\$23.60	\$1.18
<b>Total</b>	<b>141</b>	<b>\$672.50</b>	<b>\$4.76</b>

The statewide stocking rate for grazing land on 4.3 million acres averages 0.26 AUMs per acre or a total of 1.11 million AUMs (2006 DNRC Annual Report). 2006 statewide grazing land gross revenue was \$6.98 million (\$6.99 per AUM) on 4.3 million grazing acres for an average income of \$1.62 per acre (2006 DNRC annual Report) These parcels nominated for sale average 0.78 AUM's per acre and \$4.76/acre income and are above the average statewide stocking rate and income for grazing land. These parcels are small acreages which are separated from larger blocks of state land in the same section by Interstate I-15 and are consequently difficult for the State to manage.

An appraisal of the property value has not been completed to date. Under DNRC rules, an appraisal would be conducted if preliminary approval to proceed is granted by the Board of Land Commissioners. The Department is conducting more detailed evaluations at this time in order to make a determination on whether to offer the tracts for sale. The revenue generated from the sale of these parcels would be combined with other revenue in the Land Banking Account to purchase replacement property for the benefit of the Trust. It is anticipated the replacement property would have legal access and be adjacent to other Trust lands which would provide greater management opportunities and income. If replacement property was not purchased prior to the expiration of the statute, the revenue would be deposited into the permanent trust for investment.

<b>EA Checklist Prepared By:</b>	<b>Name:</b> Tim Egan	<b>Date:</b> April 25 , 2008
	<b>Title:</b> Dillon Unit Manager, Central Land Office	

**V. FINDING**

**25. ALTERNATIVE SELECTED:**

I have selected the Proposed Alternative B, recommend the tract receive preliminary approval for sale and continue with the Land Banking process.

**26. SIGNIFICANCE OF POTENTIAL IMPACTS:**

I have evaluated the comments received and potential environment affects and have determined significant environmental effects would not result from the proposed land sale. These parcels do not have any unique characteristics, critical habitat or environmental conditions indicating the tract should necessarily remain under management by the Department of Natural Resources and Conservation. There are no indications they would produce substantially greater revenue or have substantially greater value to the trust in the near future.

These parcels are entirely remnants of larger parcels of state land which were separated by the I-90 Interstate R/W. Consequently there are small isolated segments of sections east of I-90 that are difficult to manage and distinguish from the surrounding private lands. There is very little recreational value to these parcels and they are difficult for DNRC to manage due to the odd configuration. There are small acreages of irrigated grazing land which provide above average grazing revenue but overall it would be beneficial for the Trust interests to use the sale revenue to purchase consolidated and accessible land.

**27. NEED FOR FURTHER ENVIRONMENTAL ANALYSIS:**

EIS                     
  More Detailed EA                     
  No Further Analysis
